

Aderans transfers shares of Aderans BIO, an environmental and hygiene business focusing on photocatalytic technology

Aderans Co., Ltd. (Head Office: Shinagawa-ku, Tokyo, Japan; Representative Director and President: Hiromasa Suzuki), promoting the wellness industry of hair, beauty, health, and medical care on a global scale, hereby announces that it has transferred all shares of Aderans BIO Co., Ltd. (Head Office: Saga City, Saga; Representative Director and President: Masaaki Izumoto) to Daiei Industry Co., Ltd. (Head Office: Maebashi City, Gunma; Representative Director and President: Kazuaki Tozuka). The companies signed a share transfer agreement on Thursday, October 31. Aderans BIO specializes in the environmental and hygiene business, including the Aderans Group's photocatalytic and other technologies contributing to carbon neutrality as well as research, development, and manufacturing of antibacterial and antiviral products.

Aderans BIO was established in March 2021 amid the growing public awareness of hygiene management driven by the COVID-19 pandemic, aiming to develop the hygiene business utilizing photocatalytic technology with promising antibacterial, antiviral, and deodorizing effects. Since then, the company has expanded its scope to research and development in the fields of environment and hygiene as well as to planning, manufacturing, and distribution of related products within and outside Japan.

Daiei Industry mainly provides environmental maintenance services, including demolition work, asbestos removal, and industrial waste disposal. Leveraging its extensive experience in this field, the company has also been developing and manufacturing high-quality photocatalytic products in recent years. Moreover, Daiei Industry has long been dedicated to helping address a range of social issues by, for example, actively participating in initiatives to prevent global warming, such as the Eco-Action 21 and the SDGs, promoting environmental protection, and reducing its carbon footprint. Considering their business activities, corporate mission, and values, we are confident that Daiei Industry is well-suited for further developing the business that can contribute to society.
